

航空大学校 2018 年実施 学力試験

英 語

リーディング・テスト(70 分) リスニング・テスト(約 20 分)

リーディング・テスト (I ~ III)

I 次の () に入る最も適当な語句を、1~4 から選び記号で答えよ。 (1 問 2 点)

問 1. I have () apple.

1: a

2: an

3: a few

4: two

問 2. Mt. Fuji is the () mountain in Japan.

1: high

2: higher

3: highest

4: more high

問 3. Laurie () to church every Sunday.

1: go

2: goes

3: will gone

4: has gone

問 4. Kazuo is afraid of () transferred to a local office.

1: is

2: be

3: being

4: was

問 5. He () to have been an actor.

1: is seems

2: seem

3: seems

4: was seem

問 6. Remove all personal belongings from the car when you ().

1: have leaving

2: leave

3: leaves

4: will leave

問 7. What is the language () in Iran?

1: speak

2: speaking

3: speaks

4: spoken

問 8. During your regular commute, your brain, on automatic (), gets little stimulation.

1: aircraft

2: pilot

3: raise

4: train

問 9. The bank has to () both investors and intermediaries because it is in a fiercely competitive international market.

1: butter up

2: grate on

3: pencil in

4: strike up

問 10. He brought a witness to reinforce his () to the charge.

1: poverty

2: protrusion

3: ramification

4: rebuttal

II 次の各文章の () に入る最も適当な語句を、1～4 から選び記号で答えよ。(1 問 3 点)

The US electric car manufacturer Tesla Motors has announced plans to sell battery technology capable (問 1) powering individual homes and businesses.

The batteries use energy drawn from solar panels.

Tesla's billionaire founder, Elon Musk, said they'll allow homeowners to go off the electric (問 2) and will change the way the world uses energy.

(問 1)

1: at

2: of

3: to

4: with

(問 2)

1: car

2: fan

3: grid

4: shock

Many serious diseases that can be screened for at birth are not (問 3) in standard newborn genetic tests.

Full genome sequencing of newborns for existing and (問 4) disorders is now technologically possible and might soon be economically feasible.

Scientists are exploring (問 5) the resulting flood of genetic information will help parents and physicians care for newborns — or add unnecessary anxiety, complexity and cost.

(問 3)

1: included

2: cured

3: declined

4: recovered

(問 4)

1: capable

2: confident

3: potential

4: vulnerable

(問 5)

1: both

2: during

3: neither

4: whether

A cloud is a mass of water drops or ice crystals (問 6) in the atmosphere. Clouds form when water condenses in the sky. The condensation lets us see the water (問 7). There are many different types of clouds. Clouds are an important part of Earth's weather and climate.

(問 6) 1: evaporate 2: float 3: melted 4: suspended

(問 7) 1: bottle 2: tank 3: vapor 4: wave

The topic of TV can be a (問 8) one among Westerners living in Japan. Get a bunch of them together and bring up the topic, and you are sure to hear a lot of complaints about domestic broadcast options. One frequent complaint sticks out — so many programs are just about food, and how delicious it is.

I agree with this observation, but it also happens to be the reason I enjoy tuning in to most Japanese TV programs. I want to see shots of delicious-looking dishes, and I get a (問 9) out of people expressing their love for a perfectly cooked meal.

That's one of the reasons I've spent the last two months tuning into Kodoku no Gurume (Solitary Gourmet) every Friday night around midnight on TV Tokyo. The show follows a middle-aged salaryman (played by actor Yutaka Matsushige) as he eats alone in restaurants. Inspired by a famous manga of the same name, it's a simple concept that results (問 10) surprisingly captivating TV, and one that has become a hit on Twitter.

(問 8) 1: divisive 2: nutritious 3: consecutive 4: sweltering

(問 9) 1: bell 2: gain 3: job 4: kick

(問 10) 1: by 2: in 3: to 4: with

Ⅲ 次の文章を読んで、以下の設問に答えよ。

(30 点)

At first glance it seems a slight on the polite: recordings of more than a thousand casual conversations from around the world reveal that people hardly ever say “thank you” when others help them out(1).

The everyday social exchanges, which played out in eight different languages on five separate continents, highlight a global reluctance to acknowledge trivial favours, such as passing the salt. Overall, people expressed their thanks only once in every 20 occasions.

While the English language emerged as an outlier in the study, with thank yous being used more than in any other language, the phrase or similar ones were still only witnessed in 14.5% of the conversations recorded.

Rather than reflecting manners, or a descent into rudeness, the findings say more about linguistic traditions, the researchers said. Across cultures, close-knit groups of people take it for granted that people will cooperate with each other, to the point that saying thanks is no longer needed(2).

“In informal everyday interaction across the world, the general norm is to respond to another’s cooperative behaviour without explicitly saying thank you, but by simply continuing with one’s activities,” the scientists say in the journal, *Royal Society Open Science*.

The researchers studied 1,057 conversations recorded by fixed cameras and microphones in people’s homes or in places where the communities gathered. All the exchanges were casual and between people who knew each other well, such as friends and family. In more formal settings, such as buying food at the shops, the scientists believe expressions of thanks are likely to be far more commonplace.

Across all eight languages, including Cha’palaa in Ecuador, Siwu in Ghana, Lao in Laos, Polish, Russian, Murrinh-Patha in Australia, Italian and English, people were highly likely to help others when asked. On average, people responded immediately 88% of the time, suggesting they were happy to cooperate.

The scientists cast a wide net to capture any phrase that indicated thanks when someone did what was asked of them. In English, that meant terms like “sweet” and “good job” as well as “thank you”. In Murrinh-Patha, it included phrases such as “Yukuy murruwurInyima”, which translates as “That’s right, you’re beautiful”.

While cooperation was the norm, expressing thanks was not. Thank yous appeared most in

English (14.5%) and Italian (13.5%), but far less in Polish (2%) and Siwu (0.8%). The Chachi speakers of Cha'palaa, in common with the horse-mounted nomadic Dothraki in *Game of Thrones*, have no word for "thank you". It is not unusual for languages to lack the phrase, the scientists said.

"This doesn't mean that people are universally rude, nor that speakers of English are less rude than speakers of other languages," said Nick Enfield, a lead researcher on the study at the University of Sydney. "We should not conflate the feeling of gratitude with the act of expressing it(3)."

What the study leaves open is why people say thank you on the rare occasions they do. One idea the researchers propose is that saying thanks is reserved for when requests go beyond the call of duty(4).

"In everyday interaction, cooperation is the rule: social life thrives because it's in our nature to ask for help and pay back in kind, rather than just in words," said Enfield. "There is literally an unspoken agreement that people will cooperate."

問 1. 下線部(1)を日本語に訳せ。(9 点)

問 2. 下線部(2)を日本語に訳せ。(8 点)

問 3. 下線部(3)を日本語に訳せ。(8 点)

問 4. 下線部(4)を日本語に訳せ。(5 点)
